

This web site is dedicated to protecting the freedom of all peoples and the environment world-wide.

Many people worldwide are devoted to returning fellow humans to freedom from unfounded climate alarm and bureaucratic control. All the people who have supported me with their patience, advice, encouragement and challenges are acknowledged and appreciated. Although you are too numerous to list, your contributions are valued and appreciated.

Especially appreciated are scientists speaking out in huge and growing numbers to protect Nature and science. Scientists and environmentalists such as Fred Singer, Pat Michaels, Chris Landsea, Zbigniew Jaworowski, Ian Plimer, Richard Lindzen, David Archibald, Joe D'Aleo, Anthony Watts and Bob Carter who are proceeding with all their personal energy despite initial attempts to slander their names, prevent their research and stop their funding. I appreciate scientists such as radio-chemist Alan Siddons, analytical chemist Hans Schreuder, chemist Vincent Gray, electrical engineer and applied scientist Bruce Powell, author John O'Sullivan and physicist John Nicol tackling the physics and chemistry at the very core of the unfounded and disproved UN IPCC radiative back-warming supposition.

Gratitude is extended to the many courageous UN IPCC scientists and their peers for their outspoken exposing of UN IPCC fraud despite unfounded punishment and threats to their incomes, reputation and research.

Honoured are people from all walks of life and from all industries including farmer Viv Forbes, engineering professor, the late Lance Endersbee, environmentalist Lawrence Solomon, Lord Monckton, mathematician, philosopher and mineral explorer Steve McIntyre, information systems expert John McLean, investigative journalist Ian Wishart, lawyer Val Majkus, astronomer Gregg Thompson, energy advisors John Droz and Terry Cardwell, investigative author Marlo Lewis, graphic artist Melinda Rene, adviser Isabel Parlett, adviser Susie King, entrepreneur Ron Kitching, listeners Marshall Rosenberg and Cate Crombie, activist Michael Spencer and statistician Ross McKittrick devoting personal time, extraordinary persistence, scarce funds, abundant personal energy and a broad range of skills combined with their love of Nature, humanity, science and free inquiry.

Recognised are the strength and courage of political leaders demonstrating integrity. These include Czechoslovakian President Vaclav Klaus, Senator Steve Fielding, Senator Barnaby Joyce, then NSW Labor Minister Michael Costa, Dennis Jensen, USA Senator James Inhofe and Marc Morano.

Compassion for Al Gore. His face and body after losing the 2000 American Presidential election reflected the depth of his pain. I cannot know his needs that drove his movie's numerous gross errors that contradict science and Nature. Nor can I know his needs that led to his fabrications apparently in pursuit of wealth and his behaviour contrary to his own advice. Nonetheless, his movie together with Viv Forbes' invitation to expose and rectify climate alarm's many gross

errors triggered my exploration of global warming and climate alarm. The understanding that has since developed, the new friends made and the deepening of my connection with, and admiration for, Nature are priceless.

Acknowledged and appreciated are my wife Christine, our children Shane and Kelsey and my parents Ieuan and Ethel for their patience, understanding, support, encouragement, guidance and love.

Appreciated are thousands of independent citizens world-wide creating web sites and blogs, publishing papers and daring to speak out. They are part of the spontaneous, growing people's movement exposing UN IPCC fraud. They have written papers, articles, blogs and books detailing climate fraud and falsities. They seek to calmly publish facts to rectify the mainstream media's unfounded, sensationalised fear and guilt. These citizens are demonstrating integrity, courage and leadership in their care for humanity and for the natural environment—for our fellow creatures and our planet Earth.

For protecting freedom, thank you.
