1	8	3	4	3	4	Replace "climate change" with "change of climate"
2	8	3	4	3	4	Insert before "Confidence" "Despite the total absence of any succedssful future climate prediction"
3	8	3	8	3	8	Insert after "above" "but no evidence of any actual succesful prediction"
4	8	3	11	3	11	Insert after ."(see Chapter 8)" "but not from a single successful forecast"
5	8	7	10	7	10	Replace ."can often" by "might"
6	8	7	12	7	12	Delete "quickly"
7	8	7	15	7	15	Add at end. "As a result we have found it impossible to carry out a successful test on any prediction"
8	8	8	2	8	2	Replace "A full answer to this question remains elusive, but" by "Frankly, nothing"
9	8	9	3	9	2	Insert after "observed" "but not quantitatively"
10	8	9	4	9	4	Insert after "consistent" "but not in quantitative terms"
11	8	9	36	9	36	Add at end "It should be remembered that inercomparisons may merely standardise common errors"
12	8	91	4	91	4	Insert after "above". "but there is no supporting evidence for this claim"
13	8	91	7	91	7	Add at end ".but there are no examples of successful future climate prediction"
14	8	91	12	91	12	Add at end "but not from successful prediction"
15	8	92	15	92	15	Insert after "scales" "but they have never actually done so"
16	8	92	19	92	19	Add at end "even if it doesn't seem to happen"
17	8	0			1	You have to face it. No model has ever successfully forecast any future climate in quantitative terms. It is surely because they incorporate only one of the many influences on the climate, increases in greenhouse gases. Why should any of us believe them?
