Good morning Senator Birmingham.

Reportedly you've recently been reliably advised that Australia's Bureau of Meteorology has been misrepresenting climate data. This fact about the BOM is now entering the public domain.

<http://www.theaustralian.com.au/national-affairs/climate/bureau-of-meteorology-altering-climate-figures/story-e6frg6xf-1227033735740>

A small group of BOM staff including senior executives has wilfully misrepresented climate. At no time has BOM had any empirical scientific evidence that human carbon dioxide caused global warming. Further, the BOM wilfully misrepresents climate by failing to acknowledge a lack of warming and instead misrepresents brief periods of natural cyclic warming and cooling.

This is confirmed by my Freedom of Information request on BOM and CSIRO in 2013 and by correspondence with senior BOM executives and CSIRO executives.

It's documented here: <http://www.climate.conscious.com.au/letters.html>

Specifically, for details of my FOI request on BOM and CSIRO and my correspondence with CSIRO and BOM please scroll down to "Letters Sent" approximately one-third down the page.

Details of CSIRO and BOM misrepresentation of climate and confirmation of both agencies lacking any empirical scientific evidence for their implied claims of human causation are available here: <http://www.climate.conscious.com.au/CSIROh!.html>

Specifically, for BOM see Appendix 7 and for CSIRO see Appendices 6 and 6a.

All this and more has been advised with paper copies to Greg Hunt. Yet he seemingly continues to wilfully misrepresent climate. If not wilful, his behaviour is negligently irresponsible. I have advised Greg Hunt by Registered Post with Delivery Confirmation that his position is dishonest. His replies have failed to counter my material. I personally presented material to him in his office at a lengthy meeting on Wednesday, April 27th, 2011 witnessed by a third person, Gordon Alderson.

Please note some of my correspondence with Greg Hunt documented at the first URL above. Page two of my most recent letter to Greg summarises:

- [Malcolm's reply dated 19th March, 2014](#)

The direct link to that letter is:

<http://www.climate.conscious.com.au/docs/letters/20140321/GregHunt.March2014.pdf> Greg Hunt has no evidence for his repeated false and unfounded claims about human carbon dioxide and about climate. He has been provided amply and repeatedly by various reliable sources with empirical scientific evidence showing his claims are false and contradict empirical scientific evidence. His behaviour and statements endorse corruption of climate science. Please refer to Appendix 2 here: <http://www.climate.conscious.com.au/CSIROh!.html>

If I can be of assistance in any way, please advise.

Senator, it is time for you and the Liberal Party to come clean before your integrity is tarnished by the emerging truth.

Malcolm Roberts
