| 1 | 7 | 3 | 1 | 3 | 1 | Once again state your policy on confidence limits. Is it one stadard deveiation or two?. I strongly suspect it is only one. It is universal scientific practice to give two standard deviations, for $95 \%$ confidence. I propose to double the figures you give unless you can assure us that they are $95 \%$ confidence already |
| 2 | 7 | 3 | 26 | 3 | 26 | Replace "0.42 $\pm 0.07$ " with "0.42 $\pm 0.14$ " to give $95 \%$ confidence |
| 3 | 7 | 3 | 27 | 3 | 27 | Replace "0.37 $\pm 0.07$ " with " $0.37 \pm 0.14$ " to give $95 \%$ confidence |
| 4 | 7 | 3 | 35 | 3 | 35 | Replace "-0.2 $\pm 0.7$ " with "-0.2 $\pm 1.4$ " to give $95 \%$ confidence |
| 5 | 7 | 3 | 35 | 3 | 35 | Replace "1.4 $\pm 0.7$ with "-1.4 $\pm 1.4$ to give $95 \%$ confidence |
| 6 | 7 | 3 | 35 | 3 | 35 | Replace "0.7 $\pm 0.7$ with $0.7 \pm 1.4$ to give $95 \%$ confidence |
| 7 | 7 | 3 | 38 | 3 | 38 | Add at end "possibly" |
| 8 | 7 | 3 | 39 | 3 | 42 | Delete from "After" in line 39 to Years" in line 42" This is sheer nonsence. Both the atmosphere and the ocean are continually evolving. There is no possibility that either of them could EVER "equilibrate" |
| 9 | 7 | 3 | 39 | 3 | 42 | Replace "equilibrates" with "were to equilibrate". It could NEVER "equilibrate". What nonsence! |
| 10 | 7 | 3 | 43 | 3 | 43 | Add at beginning "Rough calculations indicate that" |
| 11 | 7 | 3 | 43 | 3 | 43 | Replace "has" by "may have" |

| 13 | 7 | 3 | 43 | 3 | 43 | Insert after "by" "approximately" |
| 14 | 7 | 3 | 43 | 3 | 43 | The present statement is obviously untrue. The ides of pH arose from the discovery by Svante Arrhenius of ionisation in 1887. There is therefore no possible knowledge of the pH of the oceans in 1750. Also modern measurements are not sufficiently extensive to provide a meaningful average. The variablity is so great that there will be evolutionarily favoured regions, and evolution of corals etc which develop ability to prosper in slightly more acid regions. In total the fact that more carbon is going into the ocean means a greater proliferation of marine life, not less. |
